FULL STACK DEVELOPER / SENIOR CONSULTANT

Full-stack developer with 9+ years of experience in consulting, architecture, and hands-on development. Proven success across 10+ enterprise and government projects, delivering scalable, secure, and performant solutions. Strong background in cloud-native applications, DevOps, API integrations, and full product lifecycle. Known for leadership, technical mentorship, and client engagement.

SKILLS & TECHNOLOGIES

Proficient in a wide range of programming languages including **JavaScript, TypeScript, Python, C#, Java, and Groovy**.

Experienced with backend frameworks such as **NestJS, ExpressJS, Entity Framework, Serverless Framework, AWS Lambda, and Azure Functions**.

Skilled in frontend development using **Angular, React, AngularJS, Ionic, and ElectronJS**. Strong knowledge of databases including **MS SQL, PostgreSQL (with PostGIS), MySQL, MongoDB, DynamoDB, CosmosDB, and Firebase**.

Well-versed in cloud infrastructure and DevOps practices with **AWS, Azure, OpenShift, Docker, CI/CD pipelines, GitHub Actions, Terraform, and Make**.

Hands-on experience in data and analytics tools such as **Power BI, AWS QuickSight, Pandas, ETL workflows, ElasticSearch, and AWS DMS**.

Familiar with authentication and integration services like **KeyCloak, Auth0, API Gateway, FTP, SharePoint, and various Payment Gateways**.

Comfortable using productivity and collaboration tools including **GitHub, GitLab, Bitbucket, Jira, Asana, Zoho, and Miro**.

Competent in testing and automation using **Jest, Mocha, Chai, Selenium IDE, Postman, and WebDriver**.

PROFESSIONAL EXPERIENCE

EY Design Studio (Formerly FreshWorks Studio) – Victoria, BC, Canada

Senior Consultant (FullStack Developer) | April 2022 – Present

- Promoted from Full Stack Developer to Senior Consultant post-acquisition by EY LLP
- Led solution architecture and full-stack delivery for provincial ministries and federal agencies
- Contributed to RFPs, code challenges, and engineering hiring
- Worked in agile squads with cross-functional collaboration and DevOps pipelines

Key Projects

Council of Ministers of Education, Canada

Designed and implemented Serverless Micro-services using Azure Functions and CosmosDB, integrating with external services such as Twilio, Firebase, and Oracle. Developed multi-channel notification workflows and built interactive reporting dashboards with Power BI.

Ministry Of Finance, BC

Migrated legacy data systems using Python and Groovy, developed robust data transformation pipelines, and created insightful financial dashboards with Power BI, leveraging MSSQL as the core data store to support modernization and reporting initiatives.

Ministry Of Citizens Services, BC

Developed document transformation and ingestion pipelines using NodeJS and JSON-based workflows, enabling analytics on legacy document formats. Integrated the solution into existing CI/CD pipelines for automated deployment and testing.

Land Titles, Alberta

Built an end-to-end contract lifecycle management system using C#, MSSQL, and Angular, with a strong focus on accessibility and performance at scale. Developed a custom ETL tool using Python and Pandas, and integrated Generative AI agents to automate data extraction from unstructured inputs.

Simform Solutions Private Limited – Ahmedabad, India

Team Manager (FullStack) | June 2018 – May 2022

- Managed 40+ developers and 20 interns across US, EU, and Canadian projects
- Promoted for strong technical leadership, delivery quality, and mentoring culture
- Involved in solution architecture, client technical discovery, and sprint management

Key Projects

US FinTech SaaS Platform

Designed and implemented Serverless Micro-services using Azure Functions and CosmosDB, integrating with external services such as Twilio, Firebase, and Oracle. Developed multi-channel notification workflows and built interactive reporting dashboards with Power BI.

Auction Mobility

Worked on a white-label digital auction platform, a custom-built web application for an enterprise client in the collectibles space. The goal was to provide a seamless, branded online auction experience for both web and mobile users, enabling real-time bidding, secure payments, and live auction streaming.

Intuz Solutions Private Limited – Ahmedabad, India

Team Manager (FullStack) | May 2016 – June 2018

- Built tools and internal platforms with focus on AWS cost optimization and cloud automation
- Led company hackathon-winning project
- Contributed to DevOps practices and CI/CD setup for multiple projects

Key Projects

AWS Billing Optimizer Tool

Worked on SaaS based product to help users with reducing their cost for cloud using web and desktop app to visualize and optimize multi-account AWS usage Resulted in >20% savings across 5 major clients

EDUCATION

Bachelor of Engineering (Information Technology)

Gujarat Technological University | May 2016
