Cloud Engineer | 05/2016 - 06/2018
Won a company-level hackathon in 2018 as a Team Lead

Worked on a product designed to optimize bill of AWS cloud platform

Majorly worked on NodeJS, Angular, Electron, and AWS.

Projects

Council of Ministers of Education, Canada

Creating a smooth user experience with a Cosmos DB-powered NodeJS backend on Azure Functions and integrating Twilio, Firebase, and Oracle APIs for more functionality. Integrated PowerBI to generate reports on app performance and user segments.

Ministry of Finance, BC

Reforming outdated data systems with efficiency Using Python, Pandas, and Groovy to convert fixed-width mainframe files to CSV for improved usability, and to smoothly transfer historical mainframe data via an MSSQL database into a contemporary application.

Ministry of Citizens Services, BC

Empowering Service Canada with a NodeJS-based file transformation tool, facilitating analytics generation for informed decision-making and enhanced service delivery.

Land Title, AB

Implementing a C# and MSSQL based tool to improve volume data access and a custom contract lifecycle management solution for efficient and streamlined management.

Education

Gujarat Technological University Ahmedabad | Gujarat
Bachelors in Information & Technology | 05/2016
Majorly focused in Cloud Engineering and Java Programming

Completed bachelors with distinction
